# ANKOR

Together
for **better**
**results**.

The new line
of adhesive
systems and
resin cements.

angelus®

# u-Bond

Reliable adhesion to any restorative material.

- Greater convenience: two-step adhesive system with primer and bond in a single bottle.
- Ideal for restorations and cementations.

**contains fluoride** — The presence of fluoride promotes remineralization and enhances tooth protection against caries recurrence.

Ref. 3825 – ANKOR u-Bond – 5ml bottle.

# i-Cem Dual

Dual-cure resin cement for long-lasting results.

- Reliable cementation with ideal flow and esthetics that replicate the natural tooth color.

**dual cure** — Secure bonding even without direct light.

Ref. 3828 – ANKOR i-Cem Dual – 1 syringe containing 2.5 g of catalyst and 1 syringe containing 2.5 g of base.

# u-Bond Universal

An even more simplified technique, saving time and improving efficiency.

- Enhanced adhesion with **MDP+ technology**, allowing use with a wide range of restorative materials, both direct and indirect.
- Colorless appearance that does not alter the final shade of the restoration.
- Adhesion and cementation for any restorative material.

Ref. 3826 – ANKOR u-Bond Universal – 5ml bottle.

# i-Cem Core

Dual-cure resin cement with stability for long-lasting cementations.

- Easy application: dual-barrel syringe with a ready-to-use applicator tip.
- No color change of the final restoration, due to dual-cure technology.
- With i-Cem Core, it is possible to fabricate a core build-up, providing greater practicality and efficiency in the clinical routine.

Ref. 3827 – ANKOR i-Cem Core – 1 dual-barrel syringe with 6 g + 2 mixing tips + 2 application cannulas + 2 straight mixing tips.
