THE DENTAL ADVISOR ++++

Alpha-Flow® is a radiopaque light cure resin-based micro-hybrid flowable composite. The specially formulated material incorporates both a Nano-sized filler for increased flexibility and superior polishability, and a 0.7 micron filler for excellent strength and wear resistance. This unique combination provides a material with extreme versatility for use in a wide range of procedures, including Class III and V cavity figurations, and small Class I and II restorations. Alpha-Flow® contains fluorescence to provide a duplication of the natural tooth surface.

THE DENTAL ADVISOR ++++½

Alpha II® AP is a radiopaque light-cure micro-hybrid restorative composite. The special combination of fillers form a material that is extremely durable and wear-resistant; making it ideal for Class I and II restorations yet highly polishable for use in all Class II, IV and V restorations. Alpha II® AP has optimal handling characteristics. The material can be easily manipulated without sticking to your instruments. Alpha II® AP contains fluorescence to provide a duplication of the natural tooth surface.

This self cure resin based composite contains 63% by volume of a blend of radiopaque fillers. With its ideal mechanical properties exhibiting high compressive strength and low water sorption, it has become a best seller in its category. Available in one Universal shade that blends well to the existing tooth structure yielding an esthetically pleasing restoration.

ALPHA-GLAZE® SURFACE SEALANT

LIGHT CURE
SURFACE SEALANT

REF CODE	DESCRIPTION
403.0101.002	7ml Surface Sealant with Fluoride

Alpha-Glaze® Surface Sealant is a fluoride containing light cure unfilled resin with low viscosity to be used as a finishing sealant for composites and resin cements. It is formulated to penetrate and seal the micro-cracks and surface imperfections that are created by the finishing procedures. It can also be used to treat the enamel surface prior to applying Orthodontic Appliances.

ALPHA-CORE® DC

122.0018.002	Natural (A2) Kit, 2 x 9g Cartridge, 10 Automix Tips, 10 Intra Oral Tips

Alpha-Core® DC is a highly filled radiopaque, dual cure composite in an Automix Delivery System designed specially for core build-ups and cementation of posts and pins. The material exhibited ideal mechanical properties with high compressive and tensile strength yet maintaining a dentin like feel when cutting. Its ideal handling characteristics allows for direct placement of the material with the Intra Oral Tips. Alpha-Core® DC is available in Natural Shade (A2) for use under ceramic crowns and Blue Shade to distinguish core material from the tooth structure.

ALPHA-CORE® SC

SELF CURE RESIN BASED COMPOSITE FOR CORE BUILD UPS

TECHNICAL DATA

Compressive Strength	255 MPa
Flexural Strength	110 MPa
Diametral Strength	50 MPa

REF CODE	DESCRIPTION
120.0026.002	Natural Kit: 14g Catalyst, 14 Base, Spatulas, Mixing Pads

Alpha-Core® SC is a self-curing composite specifically engineered for core build-ups and the cementation of posts and pins. The material offers superior mechanical properties, featuring high compressive and tensile strength while maintaining a dentin-like feel during cutting. Its excellent handling characteristics allow for precise syringe delivery, and it is available in a Natural (A2) shade to seamlessly mimic a tooth's natural color.

PREVENTIVES

Dental Technologies' preventive products are available to dental professionals for use during in-office procedures to address and prevent early-onset of patient oral disease.

Alpha-Dent® Light Cure Bonding Adhesive is designed for bonding composite resin materials to dentin and enamel. The ideal viscosity allows the material to penetrate into microtubules to enhance mechanical adhesion.

ALPHA-DENT® SELF CURE BONDING ADHESIVE

REF CODE	DESCRIPTION
200.0000.001	3ml Base Adhesive, 3ml Catalyst Adhesive, 7ml Etch Liquid, Mixing Pad

Alpha-Dent® Self Cure Bonding Adhesive is designed for bonding composite resin materials to dentin and enamel. The ideal viscosity allows the material to penetrate into microtubules to enhance mechanical adhesion.

ALPHA-DENT® CAVITY VARNISH

REF CODE	DESCRIPTION
407.0101.001	14ml Varnish

Alpha-Dent® Cavity Varnish is formulated without chloroform, unlike other products on the market. It is used to form a barrier to protect exposed dentin and reduce fluid leakage around the tooth restoration interface.

PROVISIONALS

Provisional materials are essential for the practice of dentistry. The ability to temporarily bond restorations, crowns, or bridges allows dentists the time they need to create more permanent restorations without sacrificing patient comfort and dental function. Quality materials must be strong, yet easy to release from the prep or temporary restoration. Dental Technologies' is proud to offer a variety of provisional materials for every practice.

Alpha-Crown® crown & bridge material is specifically designed for fabricating temporary crowns and bridges with ease and convenience. The static mixing tip provides automatic mixing from the dual chambered cartridge to greatly reduce in-office procedure time. The Bis-acryl material is very durable, color stable, and wear resistant. The greater flexibility facilitates deformation free removal of the material from the patient's mouth. Less than 4° C generated from polymerization. Alpha-Crown contains fluorescence to provide a duplication of the natural tooth surface.

ALPHA-EASE®

DESENSITIZER

THE DENTAL ADVISOR ++++½

REF CODE	DESCRIPTION
408.0101.002	Alpha-Ease® 7ml Desensitizer

Alpha-Ease® is a Hema/Gluteraldehyde desensitizer indicated for use on sensitive cavity preparations prior to the application of restorative material. It provides a physiological seal within the dentinal tubules by polymerization with the proteins in the tubules. The material provides virtually immediate relief from pain caused by hypersensitivity and is formulated with an antimicrobial to prevent micro-leakage.

ALPHA-DENT® LIGHT CURE COLOR CHANGING BRACKET ADHESIVE

REF CODE	DESCRIPTION
303.0601.001	Alpha-Dent 5g LC Bracket Adhesive

Alpha-Dent® Color Changing Bracket Adhesive is a single paste resin-based, bracket adhesive. The single paste adhesive requires no mixing; resulting in preferable handling properties, reduced adhesive waste, consistent adhesive performance, and no working time constraints. A green pigment has been added to the adhesive to make the flash visible when seating the bracket and faciliate excess adhesive removal. Once the adhesive is cured the color will fade to a natural tooth color. To assist in the removal of any remaining adhesive on the enamel surface during debonding, exposure of UV light to any remaining adhesive will produce a distinctive bright blue glow from the surrounding surface. To assist in adhesive removal, UV light is applied to change the color back to green to differentiate the adhesive from the enamel.
